

## **e-Medsys EHR “a la Carte” ...Getting EHR Your Way!**

With PracticeOne's e-Medsys Solutions Suite being available as Client Server or ASP, and with our philosophy of providing our systems *inclusive* of the EHR features noted below, we really take pride in our systems' versatility and completeness.

Of course, our e-Medsys EHR Version 5.0 - which is 2007 CCHIT Certified<sup>SM</sup> - can be obtained in full, containing all of the following capabilities.

Now, PracticeOne takes things a step further with e-Medsys EHR “a la Carte,” enabling the practice to obtain only those EHR elements that are needed today. For example, practices that want e-Prescribing can get just that\*, with the ability to add additional EHR capabilities over time, if desired.

Individual capabilities include:

- **e-Prescribing:** the most sought-after feature by medical practices today, especially in light of increased reimbursements starting in 2009 for practices using e-Prescribing. Transmit prescriptions electronically directly to the patient's pharmacy and track medication and prescription information in the process;
- **Electronic Superbill:** an incredible timesaver whereby procedures and diagnoses are entered during the encounter, eliminating the need for staff time manually posting from paper superbills;
- **Document Management:** seamless sorting and storing of scanned documents such as insurance cards, drivers licenses, letters, etc. for quick retrieval, eliminating paper;
- **Lab Management:** order lab tests directly through the system and obtain results directly back into the system, with separate alerts on abnormalities;
- **Health Watcher / Templates:** easily manage health maintenance for patients requiring follow-up care, receive alerts on overdue patients and utilize Templates to capture encounters electronically.

\*The **Doctors' Home Page** is required in order to utilize any of the capabilities noted above in “a la Carte” format. Doctors' Home Page displays the physician's virtual desk top by showing open items, messages, an “outbox / inbox” view, items pending review, etc.

Now, your practice can benefit from the EHR features needed immediately through e-Medsys “a la Carte.” Contact PracticeOne at **877-363-3797, Extension 2922** to see how e-Medsys “a la Carte” can help your practice adopt the EHR features *you* need!

PracticeOne...the Only ONE You Need!

NOTE: CCHIT Certification applies only to our full e-Medsys EHR Version 5.0. Using individual elements of it through e-Medsys a la Carte does *not* ensure CCHIT Certification, and no such certification is implied through our “a la Carte” format.
